

# The CarveWright System

# The History

- 2001 – LHR Technologies founded by NASA Robotics Engineers Chris Lovchik & David Jochim
- 2005 – BETA Machine
- 2006 – Sears CompuCarve “A” model
- 2007 – CarveWright; “B” model; PatternDepot Launched
- 2008 & 09 – Distributors & Seminars; Introduced STL Importer, POM & CarversClub; downturn in economy
- 2010 – Version C, CarveTight; FaceBook; DXF Importers, Website & Forum Rebuild;
- 2011 – First CW Conference, START U; User’s Groups; Third Party Store; Five Year Anniversary Price of \$999
- 2012 – 3D Pattern Suite & 2D Vector Drawing Suite; Website & Store Rebuild, Tap-A-Talk for smart phone, Parts Online
- 2013 – Home Depot, Keyhole Function & Designer 2.0

The CarveWright System

# The Goals

- Machine - small size with maximum output
- Software - full-featured, easy to learn & use
- Cost – affordable for Hobbyist & DIYer

# The Version C

## 2010 Version C Goals:

- Run quieter & more smoothly
- Tougher system; enhance stability
- Minimize maintenance; simplify repairs
- Add powerful new software functions
- Maximum upgrade to previous versions

## New Features

- CarveTight Spindle System\*
- Base Reinforcements
- Vertical Guide Rod Stabilizer Feet
- Reinforced Strapping on Power Supply\*
- Modified Board Tracking Sensor \*
- Simplified X Gear Drive Assembly\*
- Software and Firmware Improvements\*

\* upgrades available for A or B

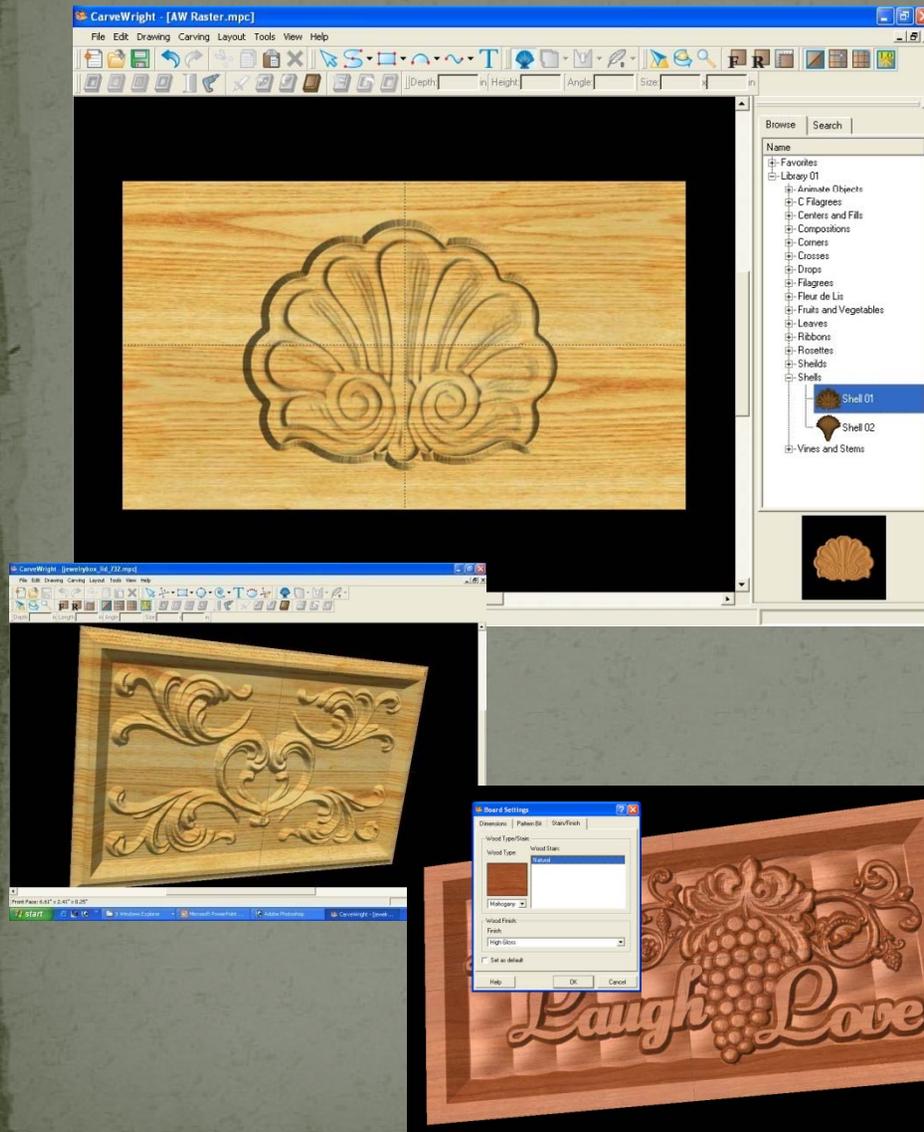

The CarveWright System

# The Machine

- Compact at 15 x 18 x 26
- Fast Carving Speeds
- Carving Length 12'
- 14.5" width & 5" height
- Carve up to 8/10" depth
- Cut up to 1" depth

# The Designer Software

## Works on PC or MAC

- PC – MS Windows 7, 8, XP; 2000 or Vista
- Mac – Mac OS X Version 10.4 or higher

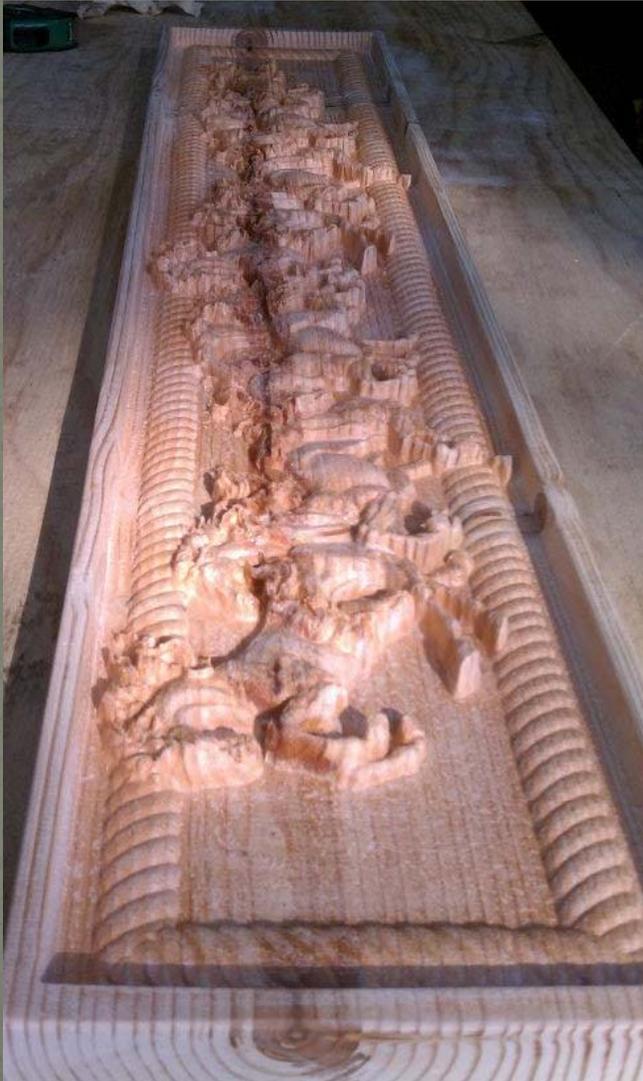

## WYSIWYG 3-D View of Workpiece

- Rotate, Pan or Zoom
- Change Wood Type/Stain/Finish

## Familiar Look & Operational Features

- Similar look and feel of Major Software Products
- Operational Features of Major Design Software
- Element Library with Drag & Drop Ease
- Advanced design features & capabilities

# The Science

- **Benefits of Full Servo Motor over Stepper**
  - Machine IQ
  - Faster Start Stop Ability (10 times)
    - Light Weight Cutting Head
    - Multiple Axis Feed
    - Spindle Speed (20,000 RPMs)
- **Benefits of CarveWright over other Servo & Stepper Machines**
  - Lower Cost
  - Smallest footprint
  - Maximum Project Capacity
  - User Friendly Software: No G-Code

# The Art

- Sign Making Big & Small
- Embellishments
- Custom Furniture Decoration
- Furniture Restoration
- Lithos & Light Boxes
- Toys & Games
- Home Décor
- Instruments
- Parts & Prototype
- Molds
- 360° Carvings
- Lamps & Clocks
- Limitless...

The CarveWright System

# Spindle Types

## Quick Change Adapter

## CarveTight Spindle

# CarveTight Spindle

## Features:

- Solid One-Piece Construction
- Made of Hardened Ground Steel
- Internally Balanced Design
- Off-Axis Paw

## Benefits:

### Drastically reduces:

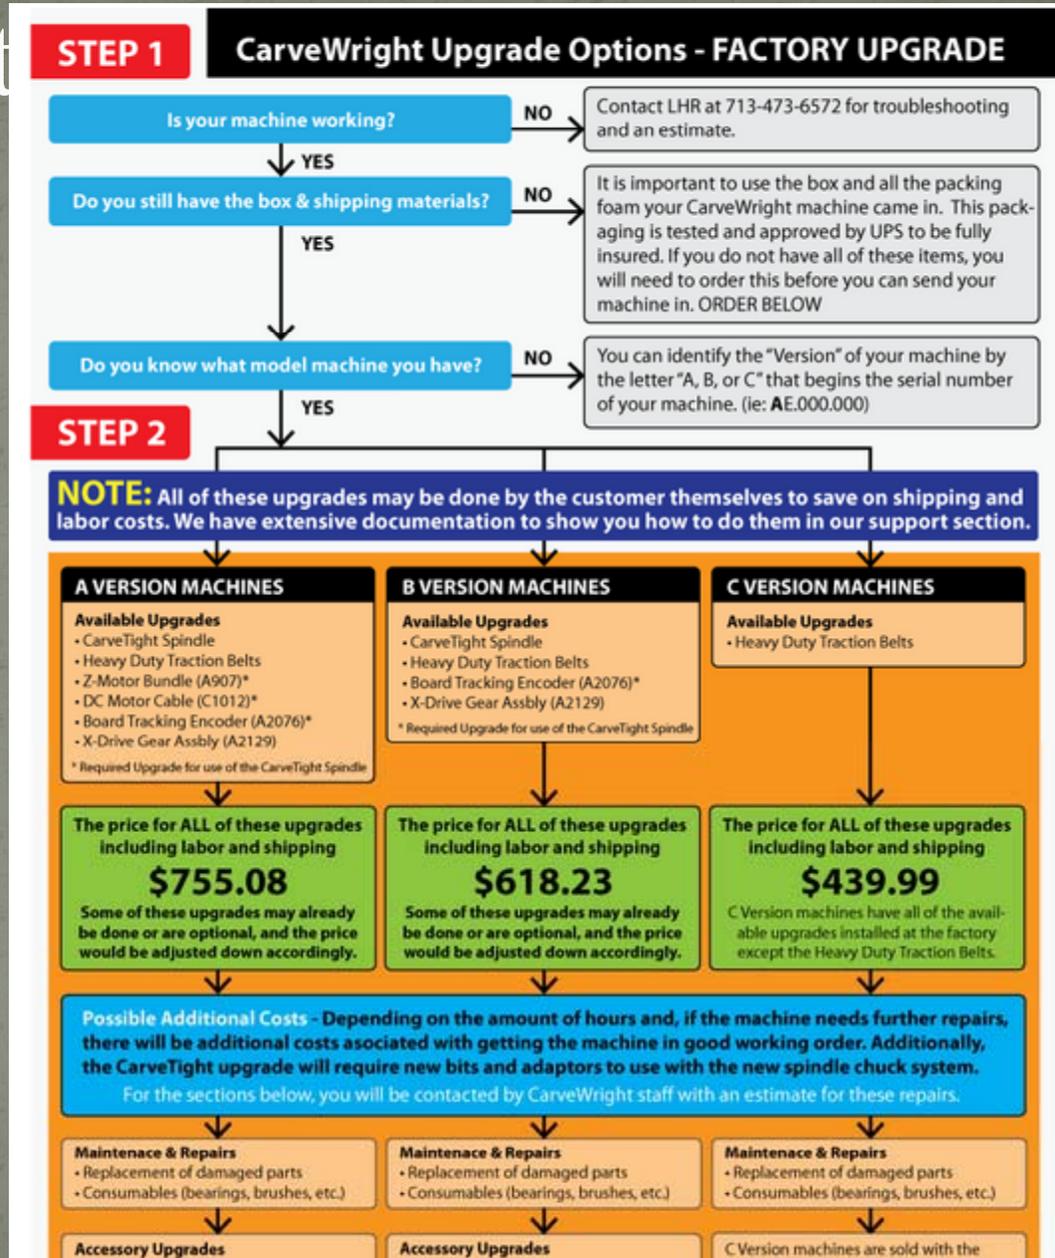

- Run-out
- Vibration
- Heat-buildup
- Noise
- Tolerance stack-up
- Bit slippage
- Maintenance

Improves overall quality of the CarveWright System

# Calculating Cost

- Customer Upgrades
- Factory Upgrade
- Evaluating Used Machine Purchase

# CarveTight Service Upgrade Package

- \$100 Savings
- Includes:
  - Shipping & Insurance both ways
  - Coordination with UPS
  - Purchase & Installation of the CarveTight Spindle
  - Purchase & Installation of the Heavy Duty Traction Belts
  - Free 1/16" carving bit
- Timeframe – 1 week each way plus 7 to 10 days (3 weeks)
- May also need:
  - New carving & cutting bits w/hard pressed adapter
  - 1/4" split collet (1)
  - 1/4" & 1/2" rubber stop collars
  - Scanning Probe Adapter
- Need Box & Packaging

Build Your Own  
At Your Own Pace

The CarveWright System

# Basic CarveWright System

- Version C Machine
- CarveTight Spindle
- 1/16" Carving Bit
- Memory Card
- Memory Card Programmer
- Sand Paper Traction Belts
- T-Allen Wrench
- Project Designer Software
- 45 minute Instructional Video (QC)
- Soft version of manual (all online)

# Traction Belts

**Sandpaper Belts**

**Upgrade Option**

# Warranty Options

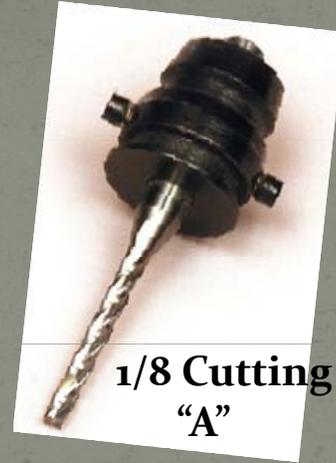

- Minimum Warranty – 30d / 10h
  - Standard Warranty – 1y / 200h
  - Extended Warranty – 2y / 400h
  - Standard to Extended
- 
- Order with machine & discounted \$100
  - 90 days after purchase

# Advanced Software

- Centerline Text
- Conforming Vectors
- Pattern Editor
- DXF Importer
- STL Importer
- 3D Pattern Modeling Suite
- Vector Drawing Tools Suite
- Keyhole Function\*

# Carbide Bits

**FOR CARVETIGHT**

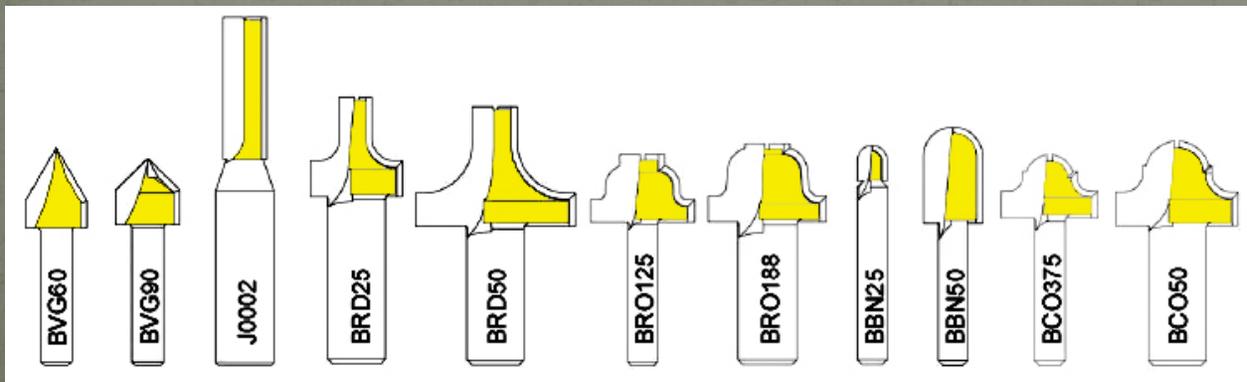

# Decorative Bits

For QC

For CT

The CarveWright System

# The Scanning Probe

- 3-D Scanning - .005"
- Step size by Quality Setting
  - Best = .010"
  - Normal = .020"
  - Draft = .040"
- Reproduce original pieces
- Hand Carvings
- Repair antique furniture
- Copy trim and moldings
- Create patterns
- Scanning Sled

**PATTERN EDITOR  
INCLUDED**

# Sanding Mops

- 180 or 240 Grit
- 3" Double or 1.5" Single Spindle
- Replacement Packs Available

**MOUNTS ON DRILL OR DRILL PRESS; NOT MACHINE**

# The Memory Card & Programmer

- Stores multiple projects
- Memory Card is manageable
- Keep Computer Clean in Office
- Keep Machine (Dust) in Garage or Woodshop
- Machine Off – Insert / Remove

Connects via USB

# Third Party Options

- Ringneck Blues DC Insert
- Erwin's Dust Devil
- Alibre Design Personal Edition

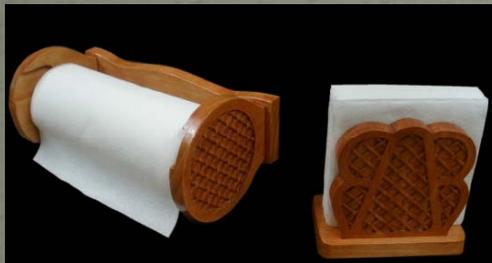

# Pattern Depot

- Buy or Sell patterns - 7,000
- Licensed patterns & projects that are protected from free distribution
- Individual Patterns or Collections usually discounted
- Complete Projects
- Subscriptions – monthly distribution for 1 year – POM or CarversClub

The screenshot shows the Pattern Depot website interface. On the left is a vertical navigation menu with the following sections: **Patterns** (with sub-items: New Patterns, Animals, Architectural and Decorative, People, Places and Things, Plantlife, Symbols and Icons, Themes, Vendors), **Collections**, **Projects** (with sub-items: Basic Projects, Intermediate Projects, Advanced Projects, Project Vendors), and **Subscriptions**. The main content area has a breadcrumb trail: Home > PatternDepot > Patterns. Below this is the heading "Patterns" and a paragraph: "Use the categories and sub-categories below to browse our selection of 3D Patterns. If you are not sure where the model might be located then try using the search tool at the top of the page. Where applicable some models are located in more than one topic." The main area contains a grid of seven items: 1. A yellow starburst graphic with the text "Most Recently Added Patterns". 2. A fish sculpture labeled "Animals" with 2010 items. 3. A decorative architectural piece labeled "Architectural and Decorative" with 3235 items. 4. A vintage car sculpture labeled "People, Places and Things" with 2378 items. 5. An apple sculpture labeled "Plantlife" with 1023 items. 6. A circular zodiac-like symbol labeled "Symbols and Icons" with 1010 items. 7. A bearded man's head sculpture labeled "Themes" with 2514 items. 8. A white box with the "CARVEWRIGHT PATTERN VENDORS" logo, labeled "Vendors".

The screenshot shows a shopping cart interface. At the top left, there is a home icon and a link that says "back to CarveWright homepage". In the center, a shopping cart icon is displayed with the text "Items: 1" and "Total: \$39.99". To the right of the cart is a red "Checkout" button. Further right are links for "Sign in", "Register", "Help zone", and "Contact us". A search bar with a "Search" button is also visible. A pop-up window shows the cart contents: "3/16" Carving Bit" with a quantity of 1, a price of \$39.99, and a total of \$39.99. Below the pop-up are buttons for "Update", "Clear cart", and "Checkout".

# Carving a Project

# Rastering

- Back & forth line by line
- Most used on CW
- Pattern Library is 3-D raster images
- Imported images

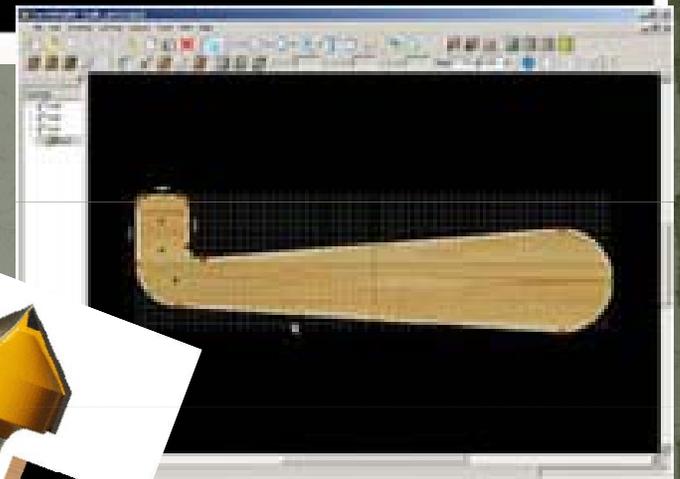

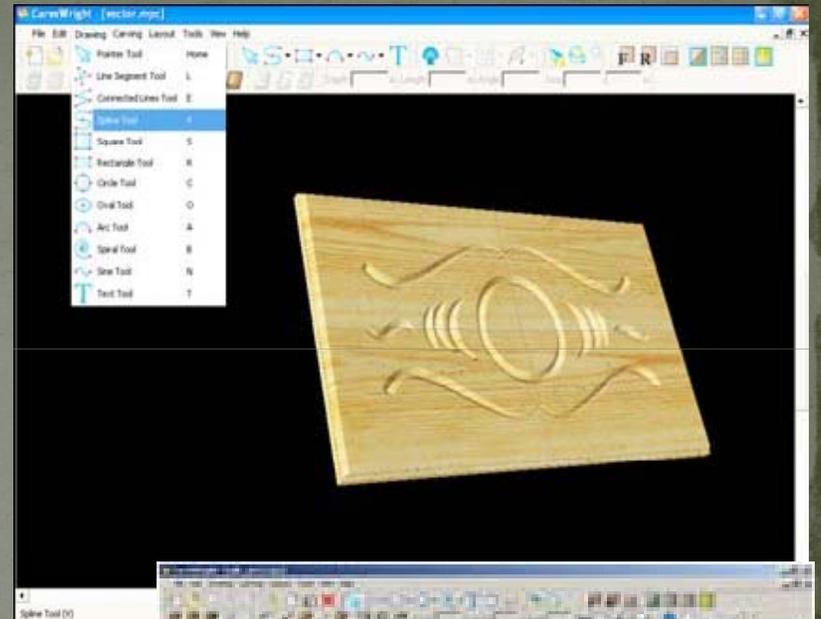

1/16", 1/8" or 3/16" carving bits

Designer > Edit > Board  
Settings > Pattern Bit

# Vectoring

- Vector cuts precisely follow a path
- Vector images can be created with the software drawing tools including sweeping curves, arcs or circles
- 2D Vector Drawing Suite
- DXF Importer
- Centerline Text is a Vector Cut
- Conforming Vectors

60 & 90 Degree V Bits  
1/16", 1/8" or 3/16" Straight Cutting Bits

# Effects on Carving Time

- Quality Setting
  - Optimum
  - Best
  - Normal
  - Draft
- Effects on Carve Time
  - Amount of wood removed
  - Size of Pattern
  - Depth of Cut

Best Quality  
20 minutes

Normal Quality  
12 minutes

Draft Quality  
9 minutes

Optimal – 2x Best  
Oak Samples – quality setting effects carving time.

# Materials to Carve/Avoid

- Approved

- Hard Woods
- Soft Woods
- MDF & Plywood
- Foams
- Formica
- Hard Acrylics

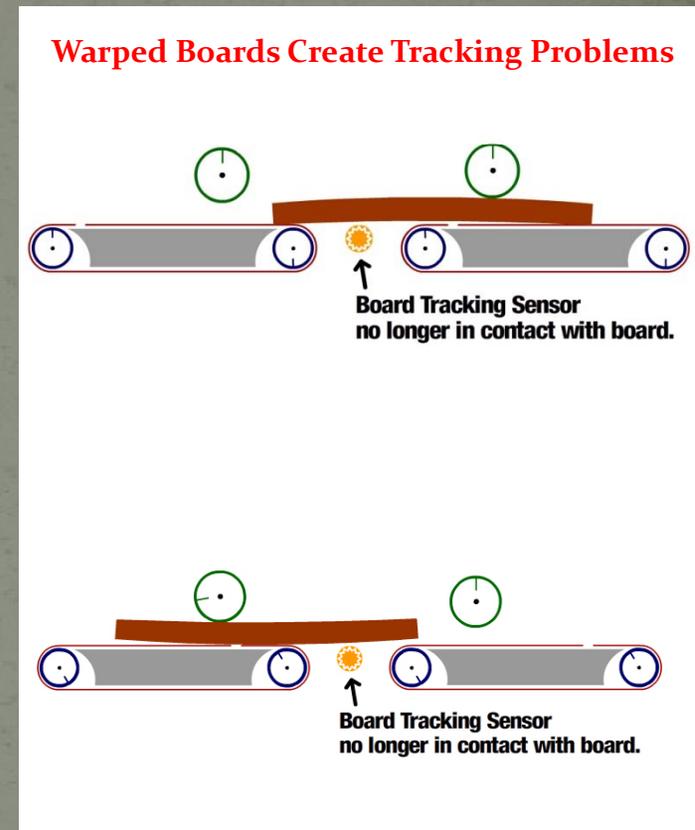

- Not Approved

- Glass
- Ceramic
- Stones
- Metals
- Concrete
- Soft Plastics

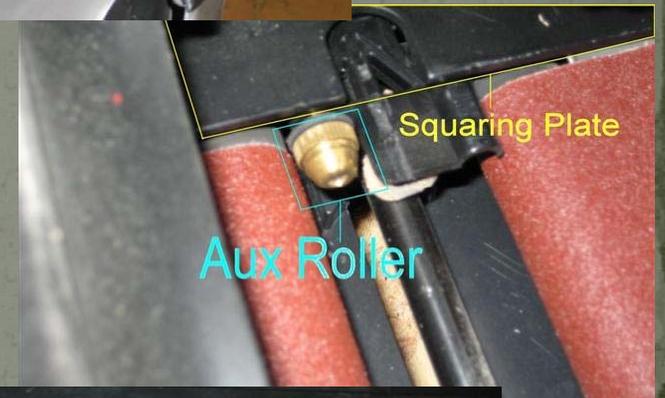

# Preparation of Materials

- Board is straight
- Surface is smoothly planed
- Widths are equal at both ends
- Edges are 90° angle
- Masking Tape!!

# Inserting Medium

- Crank head up
- Top Notches
- Snug against squaring plate
- Careful with sandpaper belt
- Board Tracking Roller
- Under rollers and crank handle down
- Slide squaring plate

# Acceptable Dimensions

## Maximum Limitations

Width – 14.5" (*Tiling Technique*)  
Depth – 5"  
Length – 12' carving

Work pieces over 3' long will require additional support, such as out-feed rollers, at the appropriate height.

**Maximum 20 lb.  
weight limit**

## Minimum Limitations

Width – 1.5"  
Depth – .5"  
Length – 7"

If any of these dimensions fall below the minimum limitations, the workpiece will require a jig.

WOODWORKING SYSTEM  
TIPS & TRICKS

April 2008

### Carving Jigs - Carrier Boards, Sleds and Rails

by Ken "DocWheeler" Johnson - Michael Tyler, Editor

*Note from the Editor:* Many of you have requested that an article be compiled regarding the use of carving jigs (i.e., sleds, carrier boards and rails) with the CarveWright and CompuCarve machines. I was pleased that my friend Ken Johnson volunteered to tackle the job and enlist the input from others who are also experienced sled and carrier board users. Ken, aka "DocWheeler" on the CarveWright User Forum, worked many hours to put this together for the benefit of all machine owners. The goal is to illustrate and explain a few of the most common types of jigs and why they are used in certain situations. And now, take it away, Ken!...

#### Carrier Boards, Rails and Carving Sleds

**Figure 1** is a basic **Carrier Board** shown here for use with thin material (under 1/2"). The Left end (viewed from keypad) must be flush with the end of the Carrier Board; the right end of the Carrier Board can be longer.

- 7 Inch Rule
- Carving Jigs – April 2008 Tips & Tricks
- Built into design

# Starting & Stopping a Project

- Insert Memory Card label side up
- Turn on machine
- Never remove Memory Card during project
- Never turn off machine during project
- To stop, raise cover lid or press Stop ONCE
- Project can be resumed by lowering lid & pressing ENTER
- Pressing Stop a second time will ABORT project

## Service Parts

You've asked and we have made available directly the parts necessary to repair your machines. As time passes, more parts will be made available directly. Any documentation associated with a part can be found on the detailed description of the part or by going to our main website at [www.carvewright.com](http://www.carvewright.com) on the of the page under Support/Service Documentation.

The diagnosis of the necessary part is best facilitated by contacting a support technician. Use the [Contact Page](#) to find a method of contacting the CarveWright/CompuCarve Support Team.
